[3D Printers](#) > [3D Printers - Upgrades](#)

Remix of the fan mount for a 4020 fan with tronxy sensor. It positions the duct a little farther than the original from the nozzle so my heat sink fan had room. Picture shown with my replacement carriage from <https://www.thingiverse.com/thing:2493062>, but it should work with original carriage too.

Edit: added second version of duct that ends closer to nozzle.
