Summary

Servo frame for Thunder Tiger TS-4N RC nitro car, still W.I.P.

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [frame](#) [servo](#) [batteryholder](#) [servomount](#)

Parts for this specific RC car seem to be going NLA and incredibly hard to find for the right price

This is still WIP and I would still have to add a battery holder to it but right now it fits and the servos fit

Added fusion360 file so it can be edited as you like.

I don't have the frame so most of the measurements are guessing work, with what measuring tools I have it's incredibly hard to get the angles precise. Again, it fits more or less now but that's all I will claim for the time being :P

Printed with Ender 3 V2

No supports, 30% infill
