A one sided bird feeder made to be put inside of a hedge to feed small hedge birds. The CAD model is made from scratch, but inspired on the work of the Mix and Match Birdfeeder by Alzibiff. The thread is made to fit an Aquarius bottle.

The hinge is changed to an open hook for easy removal to refill.

Enclosed is a model with and without grip. If put in an heavily entangled hedge, birds can use the branches to sit on while feeding.

An STL for a funnel to refill the bottle is also included.
