Upgraded to version 2 of my toothpaste holder <https://www.thingiverse.com/thing:4005721> This version adds insets for each tube spot to hold flat standing caps as well as standard twist caps. Three toothbrush spots are added where version one had none. On the bottom there are now room for six feet. First version only has three. There will be one more version coming that I feel is a bit more stylish and has room for 3 tubes and 4 brushes.
