Summary

VESA 75 Mount with a hex pocket that will fit a 1/4-20 bolt. Works perfect for a RAM B-337U with a 3/4" bolt.

VESA 75 mm mount with a hex pocket that will fit a 1/4-20 bolt. Works perfect for a RAM B-337U (remove the stud if it comes with one) with a 3/4" length bolt. I imagine you can use any other bracket or mounting system that accepts a 1/4-20 bolt!

I designed this for a project at work. We have 8" display monitors that we need to mount to a windshield while doing automotive testing.

I recommend creating a cylinder modifier in the slicer to have solid infill around the bolt hole.
