Battery enclosure shaped like a miniature 12V car battery

Dedicated for 18650 battery packs, best for 3x4 configurations

Will fit any other battery up to 75x72x98mm dimensions

Required parts:

4x M3x6 countersunk screws

2x 'Banana' binding posts

The screw-in inserts are replaceable in case the threads are damaged, or if some other type of thread is needed (step file attached).
