Some of the models are designed for rigid materials and others for flexible ones. **The models materials are not interchangeable**, so pay attention to the file names. If you have any request on the design just ask me.

For other phone cases check [this](#).

Here is the explanation of the files names:

- **Flex:** made for elastic filaments like TPU. Not tested.

- **Rigid:** made for rigid (non-elastic) filaments like PLA, ABS, HIPS, etc. The entire model is a little bigger and the holes for the buttons are opened on the front side. Tested only on PLA.
- **Banded:** It has regular horizontal grooves in the bed surface, to make the finished texture more regular, avoiding irregularities on that part, and with a better grip.

I spend part of my time making these models, letting them available and free for everyone. If you want to support my work, you can contribute with me by [donating to this PayPal account](#).
