Summary

A mount for a reflector. Fits a Xiaomi M365

[Hobby & Makers](#) > [Automotive](#)

Tags: [mount](#) [xiaomi](#) [m365](#) [reflector](#)

To install, all you need is a M5, approx 12 mm long and one M5 nut.

First thing to do is to unscrew the upper M5 already installed below the handlebar/light.

Then install the Mount in the same thread using the 12 mm M5.

Then the old M5 shall be used in the lower hole in the print, along with the M5 nut.

After this, the reclector can be installled. Can be used on a lot of “basic” reflectors
