Summary

This thing is inspired by the Lulzbot Taz Enclosure by MrMcGuire. I am using this enclosure design for my **Prusa** Mini+ with the base. I used 400x400mm acrylic glass & needed some feet, as i wanted to access the printers storage space below. So i designed these feet fitting directly to the enclosure corners.

The original enclosure design files can be found at MrMcGuire's thing page : <http://www.thingiverse.com/thing:675652>

please look at the remixes section, as there are some useful updates:

<https://www.thingiverse.com/thing:746922>

<https://www.thingiverse.com/thing:716745>

The handle on the pictures is the following thing:

<https://www.thingiverse.com/thing:4619895>

Hardware requirements

16 M5 16mm screws with the fitting M5 nuts to secure them.
