---

This is simple holder for my Garmin etrex 30 turistic navigation. May be that holder will be compatible with other models as well.

Holder is printed as separate parts to make it bit more solid. This parts shall be stuck together. As I printed all parts from ABS-T, I would suggest to use ABS dissolved in acetone as glue, this usually works perfectly to me and I do not have problems even in low temperatures.

Enjoy it ;-)

### Print Settings

#### Printer:

Rebel II

#### Rafts:

No

#### Supports:

No

**Resolution:**

0.6

**Infill:**

15%

**Notes:**

Is better to use bit more wide perimeters (e.g. 3mm) to make parts more solid.

Post-Printing =====

As I wrote in description, parts shall be glued together.
