This wreath is a fantastic decoration for February or any time Alice in Wonderland is mentioned. Using a wreath form, decor mesh, ribbons, and pipe cleaners, this home decoration is scalable and easy to assemble. No MMU is required, the auto color change feature works great in Prusa Slicer. Resin printing is best for the Filigree heart, though FDM can work with well-calibrated supports.

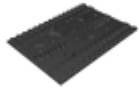

The scepter crown was remixed from the Royal Crown by ColorFabb, the card decoration and large crown are designed by BressanReinhard and Geekon respectively, links below:
