This is a remix of Nitec0re's ducted 5015 blower stepper driver cooler that's made to use a 30mm or 40mm fan.

This thing prints in two parts & snaps together. The fan mount section contains fins to rectify the airflow coming from the axial fan. This should improve airflow/static pressure from the fan a bit.

UPDATE 02-19-20: Added 40mm fan mount

Category: 3D Printer Parts
