Edit: Added a mount for the logitech quickcam

The PCB enclosure fits the logitech pro 9000 & older logitech c920 webcam's.

An articulated webcam mount that mounts to aluminum extrusion.

The webcam used is an old Logitech Pro 9000.

I removed the PCB from the original case & detached both the microswitch & microphone.

Because I printed it in ABS, I just plastic welded the lid/cover onto the PCB enclosure. Superglue should work if it's printed in PLA.
