This is the “Freight Ten” Command version as inspired by my four “Mongruxx” Novels. For all of you Sci Fy tread heads out there.

Transport your Armoured Shelter <https://www.prusaprinters.org/prints/121033-armoured-shelter-terrain-two-models> or carry the Machina to their next destination <https://www.prusaprinters.org/prints/132133-machina-robot-model-v3>

### Designed on Tinkercad.

- Four parts to assemble on the Freight Ten Command Version.
    - Print out everything.
    - Superglue the treads to the body of the vehicle, gears to the front. The gear end is the front. Note the treads match in shape the body of the Freight Ten.
    - Superglue the cab superstructure to the body to the front grill is overhanging the front slightly (see the images).
  - No print supports are needed.
  - Superglue works best for gluing it together.
  - Did not use “Variable height” layers, but it will smooth the angles on the cab if used (adds time to the print).
  - Will scale up easily if you want a larger version.
  - Full STL of the assembled model.
- Enjoy!

~~~~~

### More fun stuff:

#### Construction:

Building under construction Part 1 - <https://www.printables.com/model/174643-building-under-construction>
