Summary

I made a snorkel for Team Raffee Hardbody Cherokee XJ. Plus it has that jeep thing.

Hello.

I wanted a snorkel for my Jeep. So i made one.

It's designed for the passanger site. But you can flip in PrusaSlicer.

With the part "Bohrplatte" you can drill the holes in your hardbody.

In the snorkel will fit 2 threaded Inserts for M3 Screws (4mm diameter and 6mm depth).

Have fun
