This ambidextrous pouch allows the pistol operator to store two magazines of cartridges in his nondominant pants pocket. It holds the mags upright, minimizes rattle, and keeps pocket lint out, in contrast to carrying magazines in a pocket without a pouch. It's meant for all .40S&W models, all .357 Sig models, and all double-stack 9mm models. For single-stack 9mm magazines, see my [Glock 43 Pocket Mag Pouch](#).

Setup

- Nozzle size: 0.4 to 1.0 mm
- Width of all extrusions: 1.2mm
- Spiral vase mode

- Bottom layers: 4
- Layer height: 0.4mm
