Summary

A mini pool table to place as a marker when shooting pool

Tags: [pool](#) [billiards](#)

Originally I designed it to match a bar table and it would have had legs, but time was short so I didn't do the legs and its actually better that way. The ones I made were given to my pool team and had the team name & the season on it as shown in pictures. This model has no letters on table top. It was the 1st time using a Prusa Printer so I used all default settings in the Prusa Slicer. It needs no supports, its strait forward easy to print. The unpainted picture was the 1st, I made edits to the letters then printed and painted 8 of them.

Again the STL file I am providing has no letters on top
