Summary

Simple material stop for 10 mm T-slot table

[Hobby & Makers](#) > [Tools](#)

This is a simple material stop to be used for example on a milling table with 10 mm T-slots.

Designed to fit with 10 and 6 mm steel rods, M6 heat insert, and a M6-locking screw.

Suitable filament is PETG or similar with some flexibility.

Parts can be printed without support but some cleaning up with a drill might be necessary where bridging occurs.
