### Summary

This gizmo will create, and hold, a safe, right angle fold in your 15pin (16mm) Raspberry Pi video ribbon cable.

Tags: [cable](#) [raspberrypi](#) [ribbon](#) [raspberrypicamera](#)

Ribbon cables are a pain. To properly route my Pi's camera cable, I needed to make a right angle turn. This clip makes that turn and doesn't crease the cable. The cable bend radius is 1mm, which my research tells me is quite sufficient.
