## Summary

Slim strap adjuster for 20 mm straps that includes an opening that allows you to place it mid strap without any cutting!

Tags: [strap](#) [adjuster](#) [elastic](#)

This a remix of a great design by Xuis - I remixed it to be less bulky while providing just the right amount of friction/tension and allow it to be placed on the strap without cutting/removing it.

20 mm version, more coming soon

## This remix is based on

**15mm Strap Adjuster (Parametric)**
