I finished my HyperCube 3D Printer a while back and have been enjoying using it. I noticed that a few users have labeled their printers so I thought I would do the same. I've always liked the 1930s and 1940s Art Deco style so I came up with a font which was used on Frigidaire refrigerators from that period. The font is called Frigidaire. I have supplied an SVG file which is how I was able to pull the label into TinkerCAD to create an STL file.

Here's how to create any type font name tag: <http://www.thingiverse.com/thing:2294134>
