It's time to get your pet supplies built and 100% homemade! Although this simple house was specifically designed for roborovski hamsters, other rodents seem to enjoy this model too.

Added for future users: The entrance might be too small for pets larger than roborovski dwarfs hamsters.

A note for printing: the overall design does not need supports, although the entrance may need some sanding done. Adding supports when

printing this model is completely optional, and either way, some sanding might be necessary. As for me, I chose not to use supports, and it was fine.

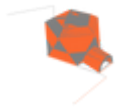

A NOTE FOR GERBIL OWNERS: If this fortress is printed for gerbils, you might want to watch out because they love to chew everything, as you might have experienced before!
