Summary

Garmin Forerunner45, conversion To normal 20mm Clock STRAP

[Fashion](#) > [Men](#)

Hello, community!

I have allergic problems with the polymeric strap that came with the clock, To resolve this issue, I have modelled a conversion to convert to normal clock straps of 20mm, are you want other measures to mail me I can change the file no problem.

Open the 3mf file to see the settings I have used and worked for me.

In the tests I made in PLA the fit was very snug and I had to make a great deal of force to assemble the converter, I made sure that the fit was very snug and I made a lot of tests to make sure it was good. But for the last version, I made it in Prusament PCblend Carbon type and the fit was more forgivable, but I assembled and worked then I don't waste more material! but your experience can be different and you maybe use other settings to work for you!.
