[Art & Design](#) > [2D Plates & Logos](#)

Reddit LED lamp. Can stand on the table with the included stand or hang on a wall with a hook on the back.

I used a LED strip on the inner circumference to light up the lamp.

face

Print the layers up to 1 mm with a nice translucent material. Change the material (gcode M600) and finish the remaining layers with an orange material.

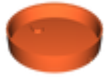

back

no special settings needed

stand

print with supports
