Summary

X-axis stepper camera mount for C270.

[3D Printers](#) > [3D Printers - Upgrades](#)

Remixed from the cable relief for the X-axis in the Prusa Mini Base set because I had a spare C270 lying around and added this extension to it for a nozzle-level camera.

Not sure if there's enough room for this without the Prusa Mini Base, here. If anyone knows if it will fit without it, please let me know.

This remix is based on

Prusa Mini Base
