## Summary

Just a simplified dial version (based on dial v3.3) for easier print.

Tags: [spool](#) [rewinder](#) [dialremix](#)

Great design by Vincent Groenhuis and I'm just trying it out.

However I run into some printing problems with the original dial design (first layer problems) and yes my setup was not OK at this time :).

I've simplified/cleaned the dial and want to share it, if someone else has printing problems with the original logo design or just wants an other design.

I've printed with 0.2 layer height with Prusament PETG without any supports and everything seems working as intended :)
