Let me introduce you to my adaptation of Thorin's ring from movie Hobbit.

The ring is designed in Fusion360. The inner diameter is 20mm so anyone can scale it in slicer to own size of finger.

I tried to apply some blue color to the place where should be a gem stone. That is the only post processing I have done.

You can see my print file with supports on print bed. It went really nice for me on my Prusa mini+.

I would be very happy to see some other prints here in comments!
