Beer Opener Ring.

Discarded another idea of the “classic” beer opener ring with hidden opener because it would have badly rotated layer lines and would probably break.

This version is easy to print.

I attached block to use as modifiers for a nice pattern (I used honeycomb for a prusaesque look) or a multi material print.

I printed it in PLA; its a tight fit and probably lasts only a few dozen openings as no metal is included.

This is supposed to be more of a joke...
