### Summary

I don't like the lack filament holder that I printed with the lack table encloser.

---

I don't like the lack filament holder that I printed with the lack table encloser. I decided to design this and it works better. My main problem is the design that came with the instructions for the lack table makes a horrible noise when it spins the filament. This doesn't Easy to print, and I used M4x25 screws but i'm pretty sure super glue will work fine.
