This is a simplified token for the cardboard corners for Bunny Kingdom. Seeing that comments about other similar pieces weren't the right size or had additional decoration (curves, etc), I remixed this with a 12mm platform which fits the bunny pieces perfectly.

Print Settings

Printer Brand:

Prusa

Printer:

i3 MK3

Rafts:

No

Supports:

No

Resolution:

200

Infill:

10% Grid

Filament: Filamentum Gold and Various Colors PLA Various

Notes:

I printed with a color change at 7.4mm height.

The extra "standard" resource farms were printed with Gold lower and a color matching the resource (the wild were done with the tan of the original corner piece).

The Luxury resources were all printed with the base matching the required terrain type (IE grey for mountains, etc.) with gold as the tower top.

How I Designed This

Replacing the tower

I took inspiration from the previous models and replaced the tower with an inverted cone and a 12mm cavity to hold the bunny tokens.

So this has the tower a bit simplified but the lower token holder remains unchanged.
