Side skirts fit on a cr-10 size bed, wheel arches fit on smaller printers. Split skirts coming soon

You will need 10-20 6-12mm m3 flat head screws to mount the arches to the side skirts, I ran with only 2 screws per arch during testing just fine with only 6mm long screws, holes support up to 12mm though.

If you like the design please consider tipping so I can buy more tires or different bodies.

5/13:

Added templates for drilling out existing skirts, align the front and rear 2 holes.

Added a split side skirt

3/10/23

Added Step and Fusion 360 Files of skirts and wheel arches

Print Settings

Supports:

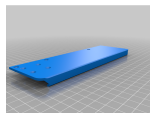

Yes

Notes:

Rear arch needs supports, block supports from generating in screw holes.
For the time being mirror for left side

Category: R/C Vehicles
