Flexi Salamander

Say hello to the **Flexi Salamander**!

This little guy is super wiggly and so much fun to fidget with. The perfect desk buddy or keychain companion.

Fun fact: Some salamanders can regrow entire limbs and even parts of their tails!

If you'd like to **sell prints** of this or my other 3D models, check out my **Patreon** and get the **commercial license**!

patreon.com/Symbiance

I've included **3 different colorways** for you to try:

- **Single color** for a clean look
- **Simple two-tone** with just the eyes popping
- **Fire belly newt** version with a super cute red belly and sides

Each version also comes as a **keychain version**, so you can take your flowy friend everywhere! (only the stl file has a cut out hole, 3mf files of the keychain version come with a negative part for the keychain hole, check before printing so you dont end up with a failed print!)

Of course, this model is perfect for testing your own creative color combos too. I'd love to see what wild or adorable styles you come up with!

multicolor & singlecolor version included!

Model is about 90mm long. It can be sized to your liking!

Print in place & no supports needed!

Have fun printing!
