Summary

Business cards or memo holders for car using magnets.

[Hobby & Makers](#) > [Automotive](#)

Tags: [car](#) [magneticholder](#) [namecardholders](#)

A holder that can be used in a car where a 10 mm bead magnet and a circular magnet are inserted into the inside during 3d printing and the base and top parts are attached so that business cards or notes can be easily held and pens can be inserted.
