Ceiling lamp with white or RGB light stripe

just need to print it in black:

- candeiro-led-2-exterior-base-preto.stl
- candeiro-led-2-exterior-topo-preto.stl
- candeiro-led-2-interior-base-preto.stl
- candeiro-led-2-interior-topo-preto.stl
- candeiro-led-base-topo.stl

you must use hot glue on the black parts, put the led stripe in, and finally, mount the white/tranlucedent parts.

i will add this intruccion to the description and a final part to hold it on the ceiling with 3 screws M4 Threaded screw, Countersunk head

Please, view new files: candeiro-led-base-fixar-tecto.stl and candeiro-led-base-topo.stl

print in white color:

-candeiro-led-2-anel-exterior-branco.stl

-candeiro-led-2-anel-interior-branco.stl

I am sharing the 3d files to print for free, so if you want to help me, you can buy the LED to this project from my affiliate program.

I will appreciate it very much, and you will be encouraging me to share more free files.
