I've started to mess around with Blender. I watched a lot of videos and then tried to recreate one from memory. This banana is based on a video by CG Geek and... man... he's fast in the video. I still rendered with Fusion 360 because... that's so much easier ;-)

As with my first Fusion 360 steps, I am now uploading my first Blender files. Is a mixture of documentation, motivation for others (because talentless people like me can do it...) and why not, someone can do something with it..

The attached 3mf file is not tested.

Link to the video added:
