This is a very practical magnetic ring to have screws, bits, nails or other small tools quickly at hand

I used round neodym-magnets with a diameter of 4 mm and a thickness of 2 mm.

Do not use heat to insert the magnets, as they will lose their magnetic effect.

just press them inside and if necessary use some glue

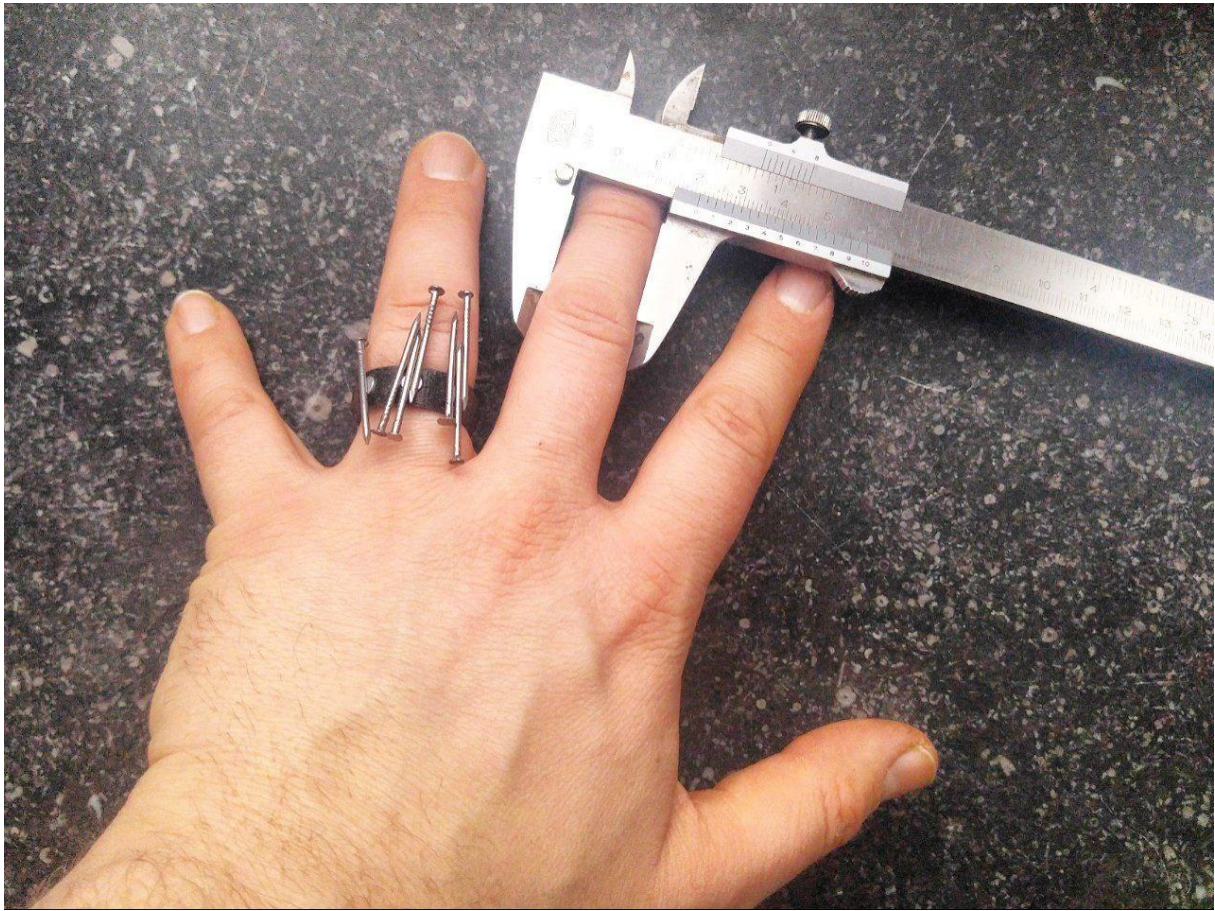

Did you drop a chunk? no problem

I'll upload other sizes in the near future. to hopefully meet your needs. I would suggest to check your finger at the ... center joint ?! and you will get the right ring size.

work done? then turn the ring over and you have a plain one

## Model files

**magnetring20mm\_v2\_r1.stl**

☐ adult big

**magnetring18mm\_v2\_r3.stl**

☐ adult small

**magnetring16mm\_v2\_r1.stl**

☐ ~ kids or pinkie finger
