Summary

IKEA kitchen cupboard guards to keep a vacuum robot of driving under the cupboard and get deactivated

[Household](#) > [Kitchen](#)

Tags: [ikea](#) [robot](#) [guard](#) [protector](#) [cupboard](#)

My IKEA kitchen cupboard is resting on relatively high legs. Unfortunately, my (iLife) vacuum robot always **just** goes below the cupboard and gets deactivated. I need to “rescue” it always.

These guards are put on the lower frame of the IKEA cupboard and prevent the robot of driving under. My height is 2cm in Frame diameter of the cupboard and 10cm from the upper frame until the ground.
