Summary

Wall mounted rack to hold four blades. I've added a .step file so you can modify the design easily for your needs.

Tags: [thingiverse](#)

Wall mounted rack to hold four blades. Print with the big end on the bed. With my Prusha MK3S I don't need supports. If I print with a 0.6mm nozzle and a 0.4mm layer height it takes a little under 7 hours to print. I used PETg, but really you can use any material. Updated February 2023 to remove the last overhang > 45 degrees.
