Tags: [scale](#) [battle](#) [lego](#) [droid](#) [sw](#)

Rescaled battle droid that prints in parts and fits together as it does in its original LEGO form.

This .stl is 400% of the original size. Can be scaled to any size !

This size is perfect as a single pen holder ➤

I printed these parts one by one and I recommend that. Both the 3mf and gcodes already have a little attachment at the bottom of the hands and head to help the bed adhesion. The orientation is purposely standing to give the parts a nice finish all and all. This has to be printed with supports on (included in gcodes) and they are very easy to remove with pliers and leave a very nice finish.

Happy printing 😊
