Inspired by the brilliant design of **Giskard Reventlov** ([original model here](#)), I present the **Auto Wash HydroBowl V2**, a complete reimaging of the original concept — now in an **expanded 240mm version**.

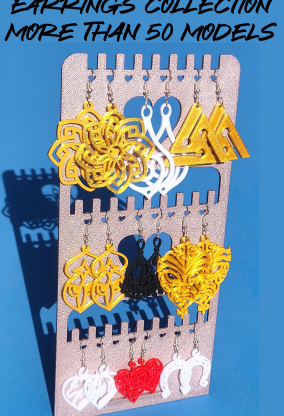

This is not a remix — it's a **full redesign**, built from the ground up. Every element has been rethought:

- The base structure
- The funnel geometry
- The flow-optimized inner cone
- Refined wall thicknesses for optimal fluid dynamics

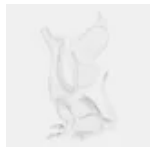

The HydroBowl V2 prints **without supports**, on most standard printers, and is fully functional straight off the bed.

Wash anything you want!
