### Summary

A collection of pencil toppers to help you wage medieval warfare against classmates and colleagues!

A quick break from my usual stuff to get a few teachers mad at me.

**Pencil Polearms** is a collection of seven pencil toppers that turn your writing implements into weapons of war. Included are a halberd, poleaxe, double axe, partisan, trident, glaive, and scythe.

Simply print the **topper** part and a blade of your choice, then snap them together. Default 0.2mm print settings will do, and any rigid filament should work. I tested the fit with standard Ticonderoga pencils, and they should work with most wood pencils. You can always scale the parts as needed!

For remixers, I've added a simplified base model for the blade section, as well as step files of that and the topper part.

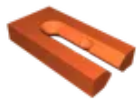

These files use a **non-commercial license**. If you would like to sell prints, you can get a seller license through my Printables Club!
