Summary

This is a remix of the original Labubu with rotating eyes just sized down to 66% or about 94mm or 3.7 inches tall.

Toys & Games > Action Figures & Statues

Labubu Mini - This model is shrunken down to 2/3rds of the original size. Plus I added the option for a keychain.

- The body can be printed without any supports. I did add a brim to make sure it doesn't tip while printing. Options include regular or “hole in head” version if you want to add a keyring
- Black Objects - pupils and nose. I added a modifier to make the bottom of the pupil opening a little wider for easier assembly. The nose will need supports so it doesn't fall. I also have MMU options (see below)
- “Pink" Objects - this includes the face, feet, hands and ears. Recommend supports for the ears and hands just to help them stay on the plate. I used a light pink filament, but the combinations are endless. I also have an MMU option below for the face/nose
- White Objects - this includes the eyeballs and teeth. I also have an MMU option below.

MMU alternatives:

- Face and nose
- Eye with pupil - I tilted the eye so it includes a support and makes it less filament changes to have the pupil included.

I purchased a 1" binder ring from amazon and it fits great.

This remix is based on
