This is a new addition to my Paralane design... the **Paralane Desk Organizer**. This organizer comes in three different sizes to fit most desktop situations. You can store large or small items you need within reach. And it rotates!!

Don't have a 3D printer or you don't have the time to print this? You can [purchase a fully printed and assembled version here](#).

I had fun working on this design and plan on making improvements.

To assemble spinner you will need some glue.

1. Print 8 spinner bearings and two spinner pins (together w/brim)

2. Print top, bottom and bearing holder
3. Use pins to align spinner top to bottom of organizer
4. Add glue and connect the spinner top with the bottom of organizer
5. Add bearing holder and bearings to bottom of organizer when its dry
6. Snap on spinner bottom
