## Summary

Infantry for scifi tabletop games inspired by British colonial infantry from the Victorian era.

Tags:  warhammer40k  victorian  imperialguard

On the planet of Veldtland, large savannahs dominate the terrain, and wealthy nobles come from all over the galaxy to hunt exotic beasts. The colonial infantry ensures that the indigenous people are kept away from interfering with the elite, keeping peace by guns, germs and steel.

These models are meant as proxies for a certain line of infantry that has not got their own models from a company that shall remain unnamed. I hope there is enough variation in stance for the infantry lines looking varied, while still presenting.

These models is based on my Soldiers of Imperium line, everything here should have source there.
