This is a very fun one, take your normal 3 in 1 fidget or 5 in one fidget and take them up quite a few levels, and you get this awesome 10 in 1 fidget!!!! this thing is so much fun, and it does not compromise on adding useless fidgets, I added actually fun fidgets to it. **This is a work in progress, and if you have ideas to make it better, please leave them in the comments!!! I hope you love this thing.**

Huge thank to @BradArchibal_1643708 for fixing the v2 fidget!!!

This fidget includes

- A clickey ring,
- A button on the side
- A button on the top
- A lever button
- A Gear Fidget
- A toggle switch

- A rocker switch
- A joystick
- A Hexagon Fidget
- A Gyro Fidget
- Textured sides for sensory

Print settings:

Supports: Highly recommended, but use painted supports, like I have in the 3mf, because it wants to generate them inside the button, therefore making it not work.

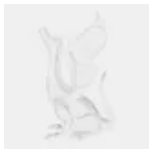

Infill: 20%

Brim: no

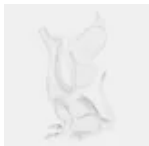

Speed: 100%

Multicolor: Not needed
