As seen on the animated TV series Star Wars: The Clone Wars, the republic starfighter V-19 Torrent swoops in to defend its cruiser from a separatist attack! Help fend off those damned clankers by flying your very own!

My other Star Wars kits: X-Wing Y-Wing B-Wing TIE Advanced

Also be sure to check out Fixumdude and Fine_Engineer!

Included is the full kit card, a loop-less variant along, with the individual parts files and a frameless version for those uninterested in the format.

There is also a minimalist 2-part stand separate from the kit, as I recommend printing in a darker colour! The ship does not stand freely without.

If it's still a little wobbly, try increasing the Z axis (uppy-downy) by 10-20%! Bribes accepted for any edits... ;)

**If printing in individual parts, be sure to print:

2x Torrent_Connector

2x Torrent_Blaster

2x Torrent_Engine**

Always love seeing your makes! Thank you :)

Interested in selling? All files are marked as non-commercial along with any remixes created from them.

If youare interested in selling physical prints of my models anywhere, be it online or offline, you can obtain a**sales license** when subscribed to Tier 4 of my**Ko-Fi memberships**!

Print Settings

Printer Brand:

Creality

Printer:

Ender 3 Pro

Rafts:

No

Supports:

No

Resolution:

0.2

Infill:

100%

Filament: Geeetech PLA White

Notes:

It's a nice snap fit for me and my printer, results may vary! To tweak the tightness, simply increase or decrease the Z height in your slicer, otherwise a little glue can go a long way!

No tools required, however I would recommend some wire snippers and a small blade for clean-up :)

Sliced in Cura! Results may vary using other slicers.
