The Fieseler Fi 156 Storch (Stork) was an unarmed liason aircraft produced in Germany before and during World War II, noted for its superb STOL capabilities. It would later be produced and flown by the French until 1970.

I tried my best to replicate the landing gear as simple as possible without being too unrecognisable.

Created as a paid commission.

For those uninterested in the card format, there are frameless variants included, alongside the individual part files! Happy Printing!

If printing parts separately, be sure to print one of each struts, as there are slight differences between them!

Makes greatly appreciated, always happy to see them!

Interested in selling? All files are marked as non-commercial along with any remixes created from them.

If you are interested in selling physical prints of my models anywhere, be it online or offline, you can obtain a **sales license** when subscribed to Tier 3 of my **Ko-Fi memberships**!

Print Settings

Printer Brand:

Creality

Printer:

Ender 3 Pro

Rafts:

No

Supports:

No

Resolution:

0.2

Infill:

100%

Filament: Eryone PLA White

Notes:

It's a nice snap fit for me and my printer, results may vary! To tweak the tightness, simply increase or decrease the Z height in your slicer, otherwise a little glue can go a long way!

No tools required, however I would recommend some side-cutters and a small blade for clean-up :)
