This is an **articulated roach** model. It has **six legs and a head** with joints that **snap into the body**. It's pretty creepy.

Printing Tips

- Available as a complete kit card or as individual parts.
- Printable at 0.3mm layer height to save time. Layer lines add to the creep factor.
- The joints are thin and need to flex to snap in place. Old or brittle filament might fail. I used Prusament PLA without issues.

- Insert the head and legs at 90° angle into the body, then rotate to desired position.

For a cuter Halloween print, have a look at my previous **Ghost Whistle** model: <https://www.printables.com/model/604285-ghost-whistle>
