Say hello to the articulated sitting pumpkin! Halloween is right around the corner, and there's no better way to celebrate it, than with this cute little fella.

It prints in place, and no additional assembly is required. I've included two versions: singlecolor and multicolor with a colored stem. The stem can be printed separately, and glued to the pumpkin. You don't need an automatic material changing system to print the multicolor version.

I hope you will like it!
