Info:

- another hand model for valve cap
- ALOHA!

Not for presta valve!

Print instructions:

- **0.4mm nozzle** works good for me (for my MTB), I have already scaled original to best fit, so just print this at 100% scale or adjust slightly.
- **3mf** file contains variable layer height, bottom part must be 0.05 layer height so the thread works well
- **no supports**
